

Muscat Flywheel Energy Storage

Overview

As Muscat aims for 30% renewable energy by 2030 and Riyadh pushes its carbon-neutral cities, flywheels are becoming the region's not-so-secret weapon. The next big thing?

Rumor has it NEOM's engineers are working on a flywheel system that could power a vertical city 24/7 –. Torus Nova Spin is an advanced Flywheel Energy Storage System designed to provide grid stability, backup power, and energy efficiency. Flywheels are not. Flywheel systems convert electricity into kinetic energy by spinning a rotor at mind-blowing speeds (we're talking 20,000-50,000 RPM!). Unlike lithium-ion batteries that degrade faster than ice in Dubai's summer, flywheels boast: Oman's capital is spinning its way to a greener future. That's flywheel energy storage in a nutshell. By the end of 2018 the global capacity for pump hydropower storage reached 160 GW whereas the global capacity for battery storage.
