

New energy storage in Spain

Overview

Spain has launched an ambitious €700 million (around \$796 million) program to increase its energy storage capacity. The goal is to improve how Spain uses renewable energy. The government of Spain has chosen the 143 energy storage projects that will receive capex support from an EU-backed scheme, totalling nearly 9GWh of capacity. Spain's environment minister Sara Aagesen (pictured above) announced that nearly €840 million (US\$964 million) would be awarded to the. Spain's storage landscape is diversifying with BESS and pumped hydro projects across multiple regions, led by major utilities and new market entrants, and a connection pipeline that signals an accelerated rollout towards PNIEC targets. 5 gigawatts, enhancing energy stability and supporting renewable integration. The initiative supports over 100 projects, promoting economic growth and community benefits while reducing reliance on fossil fuels. Spain's Royal Decree 917/2025, effective Nov. The new law, published in the Official State Gazette, introduces urgent measures to reinforce the national grid and introduces.

New energy storage in Spain

[Spain Updates Grid-Access Priorities to Boost Energy Storage](#)

Spain's Royal Decree 917/2025, effective Nov. 16, 2025, reorganizes grid-access priorities by recognizing storage as a flexibility resource, grants renewables top dispatch rights, ...

[Spain's EUR700M Battery Storage Expansion: 8.9GWh Funded, Market](#)

Spain's battery storage program expanded to EUR840M, funding 143 projects totaling 8.9GWh. Learn how this initiative creates opportunities for solar-storage hybrids and boosts grid ...

[Spain allocates EUR840m for storage projects, passes grid decree](#)

Spain has chosen the 143 energy storage projects that will receive capex support from an EU-backed scheme, totalling nearly 9GWh of capacity.

[Over 2.3 GW of storage in processing and 25 projects progressing in](#)

Spain's storage landscape is diversifying with BESS and pumped hydro projects across multiple regions, led by major utilities and new market entrants, and a connection pipeline that ...

[Energy storage is growing in Spain with 3,400 MW of capacity](#)

Spain authorizes more than 3,400 MW in energy storage, marking a rebound after the blackout and consolidating solar and battery hybridization. Energy storage has experienced an ...

[Spain's EUR700 Million Plan to Boost Energy Storage and Renewable ...](#)

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes ...

[Spain Strengthens Energy Storage Framework to Accelerate](#)

Spain's new decree on energy storage in Spain sets a 22.5 GW target by 2030, boosting grid resilience, hybrid projects, and industrial electrification.

[Spain developing 16 GW of battery storage by 2030, accounting for ...](#)

Spain is preparing for an unprecedented expansion in battery energy storage and now ranks as the world's second-largest market for project development, behind only the United States.

[Spain energy storage law: Ultimate grid boost approved](#)

Spain has approved a landmark Royal Decree to modernize its electricity grid and promote energy storage, marking a significant step in its national energy strategy.

[How Spain's EUR700 Million Program Is Accelerating Battery Storage](#)

Spain's EUR700 million program aims to boost battery storage capacity by adding 2.5 to 3.5 gigawatts, enhancing energy stability and supporting renewable integration. The initiative supports ...
