

# New energy storage projects already put into operation

## Overview

---

In the second quarter of 2024, US developers put into operation 33 energy storage projects in 10 states with an installed capacity of 2. The cumulative installed capacity of energy storage in the United States exceeded 20GW and reached 21. The expansion of renewable energy and. Recently, the American Clean Power Association (ACP) released the second quarter 2024 market report, which showed that energy storage installed capacity reached the second highest in history and the overall clean energy installation capacity reached a record high.
