

New energy storage trend next week

Overview

Global energy storage additions are on track to set another record in 2025 with the two largest markets – China and US – overcoming adverse policy shifts and tariff turmoil. By the end of December 2025, China's cumulative installed capacity of new energy. New lithium-free energy storage technology generates electricity with no moving parts. Support CleanTechnica's work through a Substack subscription or on Stripe. US presidents come and go, but the renewable energy transition is permanent and inevitable. Canadian Solar Inc (NASDAQ:CSIQ) said on Thursday its e-STORAGE unit will equip two standalone battery energy storage projects. Houston/WASHINGTON, D.
