

Oman energy storage project environmental protection

Overview

Nama Power and Water Procurement (PWP) has signed an agreement for the development of the Sultanate of Oman's first utility-scale solar and battery storage project with a consortium led by Abu Dhabi Future Energy Company PJSC, also known as Masdar. The deal was finalised by Nama Power and Water Procurement Company. Oman is on the path to sustainable national development, but timelines are needed to support accountability. Oman is predominantly arid, with most of its territory receiving less than 100 millimeters of rainfall annually. While some regions, such as the Dhofar Mountains, benefit from monsoonal. As Oman accelerates its shift towards renewable energy, attention is increasingly turning to a less visible but critical part of the power system: energy storage.
