Overview

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no shading from a remaining container structure. This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power system for off-grid or remote locations. Unlike standard solar panel containers, LZY's mobile unit features a retractable solar panel unit for quick installation. With scalable solar capacity of 30-200kW and battery storage options from 50-500KWh, Solarfold™ provides reliable power wherever. The HJ Mobile Solar Container comprises a wide range of portable containerized solar power systems with highly efficient folding solar modules, advanced lithium battery storage, and smart energy management.
