

Philippines bin tesla powerwall

Overview

The first solar-plus-storage microgrid in Asia to use Tesla's Powerpack energy storage system is designed to end power reliability issues for a Philippines community, long used to losing light and productivity to brownouts. Powerwall is a battery that stores energy, detects outages and automatically becomes your home's energy source when the grid goes down. Unlike generators, Powerwall keeps your lights on and phones charged without upkeep, fuel or noise. Yes, quite a few are being driven around Metro Manila (and beyond) but Tesla is still not a common sight. The project went online back in December, giving the town round-the-clock electric.
