

# Photovoltaic bracket raises the base

## Overview

---

If welding or connection is impossible due to structural restrictions, measures should be taken to increase the adhesion between the base and the top. And use the wire tensioning method or bracket extension fixing method to fix. Solar Photovoltaic (PV) system as a source of renewable electricity. Solar mounting panels are necessary to increase the efficiency and probability of the solar. Whether you're installing ground-mounted panels or a rooftop system, understanding how to use photovoltaic bracket bases properly can mean the difference between a system that lasts decades and one that becomes a neighborhood eyesor Let's face it - nobody gets excited about photovoltaic bracket. The invention discloses a photovoltaic bracket. The bracket comprises a photovoltaic panel supporting frame and a plurality of lower supporting frames, wherein each lower supporting frame has a base, a first upright column, a second upright column and a diagonal brace; each first upright column. The role of photovoltaic brackets in photovoltaic systems is to support and fix photovoltaic modules to ensure that they can stably receive sunlight and convert it into electrical energy.

## Photovoltaic bracket raises the base

---

### CN106712674A

The present invention relates to technical field of photovoltaic power generation, in particular it relates to a kind of photovoltaic bracket that may be disposed at container top.

### [Tips and methods for leveling photovoltaic brackets](#)

The installation selection of photovoltaic ground brackets is mainly based on factors such as the fixing method of the bracket, terrain requirements, material selection, and the weather

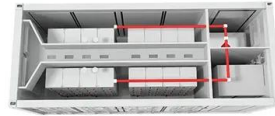

### [Build a photovoltaic bracket production base](#)

After several years of accumulation, Dongsheng Photovoltaic has a first-class research and development team, not only to provide customers with a single photovoltaic bracket products,

### [Different types of roof photovoltaic bracket installation methods](#)

The photovoltaic bracket is a bracket designed for placing, installing and fixing solar panels in a solar photovoltaic power generation system. Common materials include aluminum alloy, ...
