

Photovoltaic distributed support bidding

Overview

Search all the solar photovoltaic (PV) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in United States (US) with our comprehensive online database. A working understanding of contract development best practices and access to standardized solar contract templates and request for proposals (RFPs) will help reduce the time and cost associated with this process by improving project transparency and accountability while accelerating solar. Get expert support and quick resolution of issues with our always available email, phone, and chat-based assistance. Clean and user friendly interface to quickly and easily find what you're looking for. Quickly act on new opportunities and make informed decisions. Accurate data enhances efficiency. The Federal Energy Management Program's (FEMP) Distributed Energy and Energy Procurement initiative helps federal agencies accomplish their missions through investment in lasting and reliable energy-generation projects and purchases. The company hosted an informational webinar for interested bidders at 1:00 p.m. Submissions for the All-Source RFP are often utility scale. Will PSE be interested in reviewing distributed solar projects (1-5MW) in this RFP, one of which is a nameplate capacity of 5 MW or greater.
