

# Photovoltaic integrated battery panel

## Overview

---

Solar panels with built-in batteries offer enhanced energy independence, allowing homeowners to power their homes even during grid outages. These systems optimize the self-consumption of solar energy, reducing reliance on the grid and maximizing cost savings. The AES Lawai Solar Project in Kauai, Hawaii has a 100 megawatt-hour battery energy storage system paired with a solar photovoltaic system. Sometimes two is better than one. By seamlessly integrating energy. That's why residential solar power combined with battery storage (once an esoteric niche industry) is rapidly becoming a mainstream disaster-preparedness choice, according to more than a dozen installers, manufacturers, and industry experts we interviewed.
