

# Photovoltaic panel leaking

## Overview

---

Signs of a roof leak under solar panels include water stains, damp odors, water pooling, and decreased energy production. To fix a roof leak, identify the source, repair the roof, inspect and upgrade the mounting system, and reinstall and seal the solar panels properly. In virtually all cases, the answer is no. Almost always, homeowners will notice the leak. In the worst-case scenario, roof damage from solar panels can even lead to leaking within a home, which could cause further complications and safety concerns for the property and its inhabitants. But don't worry—you're not alone, and this issue is more common than you might think. Imagine investing in a brand new energy solution, only to discover a nightmare later: a poorly installed solar panel system that's left you with a roof leak to fix. In this post, we'll explore the main reasons behind potential leaks, how to prevent.
