

Photovoltaic panel power station closed down

✓ 100KW/174KWh

✓ Parallel up-to 3sets

✓ IP Grade 54

✓ EMS AND BMS

Overview

2 billion solar thermal project in the Mojave Desert in the early 2010s, with 75% of it funded by the Obama administration through loan guarantees. Its closure is not the end of solar power, but it does show how quickly an industry can change, and how even bold ideas can be overtaken by economics. To understand Ivanpah, you have to go back to the late 2000s. Unemployment was high, the housing. LAS VEGAS (KLAS) — The landmark Ivanpah solar energy plant along Interstate 15 near the Nevada-California border is past its prime, left in the desert dust as more efficient technology is producing power cheaper these days. In short: Opened in 2014. California built a \$2. It is now closing operations, but the plant's closure is not an indication cost problems for the solar industry. Image: Pacific Southwest Region USFWS / Wikimedia Commons / CC SA 4. Editor's note (Septem): This article was first published in January 2025 when PG&E and project owners announced plans to terminate two Ivanpah PPAs.

Photovoltaic panel power station closed down

[Ivanpah Solar Closure Was Announced in January ...](#)

Once a breakthrough in solar-thermal power, the facility faces closure due to high costs, environmental concerns, and shifting technology.

[Trump and Biden both want this California solar facility to close. The](#)

The Trump administration wants to see this unusual power plant closed, and in a rare instance of alignment, the Biden administration did, too.

[Solar plant on I-15 near its end, shutting off in 2026, officials say](#)

Now, two of the three units at the Ivanpah Solar Generating Station are scheduled to go offline in 2026 in the interest of saving money for California ratepayers, according to plant officials.
