

# Power generation price of simple solar panels

## Overview

---

If you just need a few panels for a small do-it-yourself project, expect to pay around \$200 to \$350 per panel (between \$0. These prices don't include the cost of a solar storage battery, which can add anywhere from \$7,000 to \$18,000 to your total solar. As of 2026, the average cost of residential solar panels in the U. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2. 50 per watt of installed capacity (more on price per watt below). Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. Solar panel costs range from \$16,600 to \$20,500 for the average 6. To find the most up-to-date solar panel costs in 2025, we compared research from the U. While that price tag seems steep, the electricity bill savings you get from solar panels make them a worthwhile investment for most Americans.
