

# Protection level of solar battery cabinet module

## Overview

---

Cabinets here must offer strong durability and protection to keep networks running. Features: IP65 rating (dustproof, rain-resistant), corrosion-resistant steel with UV coating, built-in heating for -30°C to 50°C operation. Usable Battery En rcurrent, battery temperature, cabinet swi mperatures above 104 °F (40 °C) and below 32 °F (0 . An outdoor solar battery cabinet is not just a metal box; it's a critical component engineered to shield a significant investment from the elements. ), design these enclosures with. The IP rating, defined by the IEC 60529 standard, specifies the level of protection provided by an electrical enclosure against the entry of solid particles and liquids. Measured 1 meter from a single CSS-OD Battery Cabinet and Battery Inverter. Power derating may apply in the range of -20 to -10 °C. 7-1km (indoor) as per SolarEdge exclusive decision dependent on use case and site environmental conditions. 1 seconds when the main supply fails. Features: Modular design allows flexible scaling (e., 3 modules for 10kVA UPS, 6 modules for 20kVA UPS), hot-swappable without downtime.
