

Regulate the price of solar glass

LFP12V100

Overview

Over the past year, photovoltaic (PV) glass manufacturers have signaled plans to reduce prices by 15–20%. Technological advancements: Solar control glass is a type of glass that is designed to minimize the amount of heat that enters a building through its windows while still allowing natural light to enter. As in India and China, new facilities are popping up in North America, with unique twists to ensure competitiveness, such as using recycled material.

Department of Energy, solar energy solutions accounted for about 3. Recently, the Centre imposed anti-dumping duty in the range of \$658/MT to \$664/MT for imports from China and \$570/MT to \$664/MT from Vietnam, Mercom reported. The price surge has been chiefly attributed to heightened demand driven by the global shift.
