Overview

The return on investment of a solar panel installation depends on its location, performance, efficiency and size, but 10% is average. You can maximize your solar panel ROI by taking advantage of rebates and other incentives and participating in net metering through your local. Installing solar panels is a long-term investment that can pay for itself through utility bill savings.

Calculate ROI Here The average American household pays a monthly electric bill of \$118. 16/kWh see the strongest returns, with payback periods as short as 4-6 years in high-rate states like California and Hawaii. But the payback time and ROI is different for everyone.
