

Scale of flywheel energy storage power station

Lithium Solar Generator: \$150

Overview

A flywheel-storage power system uses a flywheel for grid energy storage, (see Flywheel energy storage) and can be a comparatively small storage facility with a peak power of up to 20 MW. The makers of the Dinglun station have employed 120 advanced high-speed magnetic levitation flywheel units. For discharging, the motor acts as a generator, braking the rotor to.
