

# School uses Oceania off-grid solar container smart

## Overview

---

Architecture For A Change built this school from shipping containers, and is complete with solar power and a rain water collecting system. The project consists of a 56 kWp grid-tied solar photovoltaic (PV) system with an integrated 80 kWh battery storage solution, designed for self-consumption and backup power during. Installing decentralised solar photovoltaic systems in African schools can help improve education, boost economic. Shipping containers are designed to withstand harsh weather conditions and physical impacts. This durability ensures that students and educational materials remain safe from external threats, be it extreme weather, vandalism, or theft. Te Kura o Papatuanuku has been donated a used shipping. Below is a narrative description of how a solar-powered shipping container is revolutionising the face of access to global energy, off-grid energy, grid backup, and clean development for applications ranging from European building sites to African communities and the rest of the globe.
