

Solar Energy System General Contracting

Overview

What does solar EPC general contractor mean?

A solar EPC general contractor refers to a company or entity responsible for overseeing the execution of solar energy projects from conception to completion. We are leading solar energy facility contractors. We design, build, expand and maintain efficient, cost-effective solar energy facilities from the ground up, helping our clients meet growing needs for clean, sustainable power and ongoing energy conservation. The acronym EPC stands for Engineering, Procurement, and Construction, encapsulating the three core phases of solar project development.
