## Overview

---

Each system is housed in a robust, environmentally controlled cabinet (IP55) that includes all essential components for seamless operation: power conversion system (PCS), fire suppression, static transfer switch (STS), HVAC, and PV-ready MPPT. The Symtech Solar Battery Energy Storage Cabinet (MEG 100kW x 215kWh) is a fully integrated, PV-ready hybrid energy storage solution designed for both on-grid and off-grid applications. Built with Tier 1 LFP battery cells (EVE), this system delivers safe, reliable, and long-lasting performance. Dual fire suppression, ATS/STS ensure seamless power switching. Integrated BMS/PCS/EMS supports diverse applications. DC coupling, full fault protection, low battery cycling, auto current sharing, and fast delivery with. Among the latest advancements, the Hybrid Solar Energy System Storage Cabinet has emerged as a key solution to manage energy generation, distribution, and storage in one compact, modular design. Engineered for both industrial and residential applications, these systems are transforming how we. The MOBICELL-350 is the cabinet-mounted counterpart to our proven MOBISUN-350 trailer system. Built in a rugged, insulated NEMA 3X enclosure and skid-mounted for easy siting, the MOBICELL-350 integrates solar panels mounted on the outside walls of the cabinet, a 20 kWh AGM battery bank, and a 350W. Enter the PV storage cabinet: a fully integrated enclosure that brings together lithium battery packs, hybrid inverters, energy management protocols, and safety systems into one scalable solution. When deployed correctly, these cabinets not only ensure energy availability—they shape how projects.
