

# Solar energy policy belgium

## Overview

---

Belgium plans to boost its photovoltaic (PV) capacity to 33.6 GW by 2035 as part of its draft national energy and climate plan (NECP). The policy aims to balance three main objectives: reducing energy consumption, expanding reliable energy capacity and enhancing the competitiveness of the Belgian industry, which faces high energy prices. Under the draft NECP, Belgium is targeting a total installed capacity of 9.5 GW by 2035. Energy Minister Zuhair Demir supports this with an 800-watt limit per household to ensure safety and efficiency. According to the officials, Belgium is making it easier for. 2024 BIPV Award winning BIPV solar façade from Kameleon Solar and Soltech located in the new Soltech factory in Genk As Belgium is a federal state the responsibilities for energy policy are divided among the three regions (Flanders, Wallonia, Brussels) and the federal government which is. Energy policy has always required a long-term perspective, as future generations depend on policymakers to ensure secure, reliable, and sustainable energy decisions. In 2025, this need is more urgent than ever, with the arrival of Generation Beta and a political landscape reshaped by the Belgian.

### [Belgium's New Energy Plan: Solar Target Raised to 33.6 GW by 2035](#)

Belgium plans to boost its photovoltaic (PV) capacity to 33.6 GW by 2035 as part of its draft national energy and climate plan (NECP). The plan lays out the country's strategies for renewable energy, ...

### Solar power in Belgium

Overview  
Timeline  
Notable installations  
Solar PV market by segment  
Flanders

2007 Installed capacity of solar power increased drastically after 2007. During 2009 the amount of solar installations quadrupled from 16,000 to 65,000. Residential and small installations had a combined power of about 220 MWp. 2009

### Solar power in Belgium

In March 2022, a EUR 1.2 billion initiative was launched to increase renewable electricity production. This initiative funds solar photovoltaic (PV) installations at national railway stations, equipped with electric vehicle ...

### [Mandatory solar installation for large consumers](#)

The Solar Energy Plan 2025 is taking shape for Belgium's energy transition: the mandatory installation of solar panels for large energy consumers. This measure aims to stimulate the adoption of renewable energies and ...

## High Voltage Solar Battery

### [Belgium's solar energy capacity continues to grow despite its limited](#)

Belgium's moderate climate, strong policy frameworks, and energy transition goals make it one of Western Europe's most mature solar markets. Whether for urban homes, industrial roofs, or EV-ready households, ...

### [Belgium launches 800W balcony solar panels from April 17](#)

To keep people and the electricity grid safe, the Energy Minister wants to limit how much power each home can get from solar panels. She wants to set a limit of 800 watts per household, which means ...

### [Belgian energy policy 2025: Federal, Flemish, and Walloon](#)

In this update, we provide an objective analysis of Belgium's evolving energy policy based on the respective government agreements. Energy policy has always required a long-term

### [Belgian energy policy 2025: Federal, Flemish, and Walloon governments](#)

Energy transition and renewable energy: The government sets ambitious targets for renewable energy, including an increase in wind power from 2.5 GW to 2.8 GW and solar power from 6.7 GW to 10 GW ...

### [Belgium National Energy and Climate Plan \(2021-2030\)](#)

They were established in order to reach the EU's climate and energy targets for 2030, including the reduction of greenhouse gas emissions by 55% compared to 1990 and 60% of renewable electricity ...

### [Belgium Renewable Energy Policy Handbook 2025 Update](#)

The report covers policy measures and incentives used by Belgium to promote renewable energy. The report details promotional measures in Belgium both for the overall renewable energy industry and for ...
