

Solar inverter warning light

Overview

Watch the lights on your inverter. Green means it's working fine, but red or orange could mean trouble. Use a solar app to see how much energy is made. Your inverter has a switch and three colored LEDs that indicate system information, such as errors or performance. The following tables detail the possible LED and switch combinations, and what they mean. Any combination of LEDs on. In this article, we will provide a comprehensive explanation for all messages generated by Solis inverters, ranging from operating messages to alarm messages.
