

# Solar panel 585 specifications

## Overview

---

SEG-585-BTA-BG has solar cells half the size of those installed in conventional panels. The main benefits are decreased power loss, improved longevity and better low-light performance. As a result, the panel achieves an impressive efficiency of 22. In the world of renewable energy, the 585-watt solar module stands out as a game-changer. If you're new to solar technology or simply curious about upgrading your energy setup, this guide will. Better light trapping and current collection to improve module power output and reliability. Excellent Anti-PID performance guarantee via optimized mass-production process and materials control. High salt mist and ammonia resistance. 0 technology has better reliability. For wholesale pricing and availability contact your local Greentech Renewables or: Approvals Let us know what you're after through this form or by contacting a location near you and we'll promptly get you a quote with pricing and local availability.
