

Solar panels installed on the roof to generate electricity

Overview

Rooftop solar power, also known as rooftop photovoltaic (PV) systems, refers to solar panels installed on residential or commercial building rooftops to generate electricity. 4 million American homes now powered by solar panels. As we enter 2025, technological advances, improved financing options, and strong federal incentives have made rooftop solar more. You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. Even though there are some DIY solar panel options, installing them is a highly complex project, and you'll still need assistance from an experienced professional.
