

# Solar panels to block snow

## Overview

---

Installing an automatic heating/cleaning system is the best way to remove snow from solar panels. Let's break down what actually works, what doesn't, and when snow removal really matters. ☐ Snow is overrated as a solar problem - Properly installed. Solar panels provide a reliable source of clean, free energy, yet many people assume they only work well in sunny climates. The elements will inevitably take their toll on your system and reduce its effectiveness the longer that you leave it exposed to the elements. One of the simplest yet most effective ways to protect your solar panels from. Because heat can actually cause the photovoltaic cells that make up the panels to perform suboptimally, colder temperatures (especially colder temperatures without snowfall) are ideal for solar panel function. I talked to several experts to get their insights into this process.
