

Solar power generation in rural Laos

Overview

Solar is becoming a viable, affordable power solution for many in rural Laos. Laos' combination of moderate-to-strong solar potential, rural electrification needs, and sustainable development goals makes it a high-impact market for solar energy. ASEAN member Laos has plans to increase renewable energy in its power mix, notably solar power buildout. However, it continues to rely on hydropower and coal-fired power plants to generate electricity, complicating both its way forward and decarbonisation plans. The Strategy firstly provides.

Geographical Location: Laos is a landlocked country in Southeast Asia, bordered by China to the north, Vietnam to the east, Cambodia to the south, Thailand to the west, and Myanmar to the northwest. It is a mountainous and forested country, with much of the population living in river valleys and. Solar power has improved the livelihoods of local people.
