

Solar power generation made from popsicle sticks

Overview

Watch how this amazing mini boat is built using simple popsicle sticks and powered by 3 solar panels! No batteries needed — just sunlight! Perfect for scienc. How To Use Popsicle Sticks To Create A Wind Turbine?

This video tutorial demonstrates how to make a wind turbine using popsicle sticks, a simple and eco-friendly DIY craft. Popsicle Stick Pulley System: Build a pulley system to lift objects and understand mechanical advantage. This creative endeavor not only enhances your living space but also promotes sustainability by harnessing solar energy.

Solar power generation made from popsicle sticks

Microsoft Word

The side that has the sticks cut in half should be facing upside down. To make the blades, glue four sticks on each side of the cross-shaped blade at a slight angle.

Microsoft Word

Grab the bottle cap with the DC motor inside and glue it on top of this small popsicle stick. Now, hot glue gun the 3V solar panel on the two inner diagonal sticks of the car.
