

Solar power generation means no electricity bills

Overview

Yes, you may still receive an electric bill after going solar, but it will likely be much lower and in some cases close to zero. Whether or not you owe anything depends on how much energy your solar panels produce, how much you consume, and how your utility structures its billing. How much depends on several factors. Some or all of the mortgage lenders featured on our site are advertising partners of NerdWallet, but this does not influence our evaluations, lender star ratings or the order in which. While those with solar panels typically still pay for electricity, many find that their bills are significantly reduced thanks to the energy produced by their systems. In fact, according to Aurora Solar's 2025 Solar Snapshot, that's the case for 72% of homeowners. This isn't true in most cases: most solar panel systems in the U.S. are grid-tied, allowing customers to draw electricity from the grid when their.

Solar power generation means no electricity bills
