

Solar power procurement contracts

Overview

A Solar Power Purchase Agreement (SPPA) is a financial arrangement in which a third-party developer owns, operates, and maintains the photovoltaic (PV) system, and a host customer agrees to site the system on its property and purchases the system's electric output from the solar. A Solar Power Purchase Agreement (SPPA) is a financial arrangement in which a third-party developer owns, operates, and maintains the photovoltaic (PV) system, and a host customer agrees to site the system on its property and purchases the system's electric output from the solar. A Solar Power Purchase Agreement (SPPA) is a financial arrangement in which a third-party developer owns, operates, and maintains the photovoltaic (PV) system, and a host customer agrees to site the system on its property and purchases the system's electric output from the solar services provider. Contracts are the most common form of contract used to undertake construction works on utility-scale solar projects by the private sector. 1 Under an EPC Contract, a Contractor is obliged to deliver a complete facility to the Project Company. The Project Company needs only to turn a key to start. The Blueprint How-To Guides, in contrast, provide additional detail to help practitioners get going. Awardees can reference these more granular steps, recommendations, and resources within each key activity as they get started implementing their EECBG projects and programs. By using these. This Solar Power Purchase Agreement (this "Agreement") is entered into by the parties listed below (each a "Party" and collectively the "Parties") as of the date signed by Seller below (the "Effective Date").
