

# Spanish environmentally friendly solar glass

## Overview

---

These microscopic structures prevent light reflection, help the glass remain clean autonomously, and cool the solar cells during hot days. Founded in 2009 in Spain, Onyx Solar manufactures photovoltaic glass to reduce the carbon footprint and energy consumption of all kinds of buildings. The photovoltaic glass offered by Onyx Solar possesses mechanical properties identical to those of conventional architectural glass used in. As Onyx Solar, we are proud to be the world leader in the design and manufacture of architectural, photovoltaic glass for buildings. They can generate between 150 and 225 W/m<sup>2</sup>. While currently manufactured and marketed in Spain, they may soon be available in Germany. At Sphinx® Glass, we understand that sustainability is not a luxury, it's a necessity. She presented it as part of her.
