### Microsoft Word

In this paper, the analysis of two different design approaches of solar panel support structures is presented. The analysis can be split in the following steps.

### [New photovoltaic support foundation construction](#)

Photovoltaic support foundations are important components of photovoltaic generation systems, which bear the self-weight of support and photovoltaic modules, wind, snow, earthquakes and other loads.

### [Structural diagram of photovoltaic support without cement pier](#)

Double-column pier bridges are widely used in complex traffic structures, such as mountain bridges and large urban interchanges, due to their high resistance to overturning,

### [Photovoltaic support foundation structure drawings](#)

PV panels are mounted on a support structure, typically with a fixed tilt; however, variable tilt angle solutions have been developed due to a sun tracking system to
