

# Three-phase folding containers used at drilling sites

## Overview

---

Three-phase separators are a fundamental tool in assisting with maintaining safety, productivity levels as well as the quality of the product in the oil and gas industry. They help by lessening the requirement for any kind of repair and maintenance. Are foldable containers effective in repositioning empty containers?

Foldable containers are considered an effective solution to deal with the endemic imbalance in the repositioning of empty containers. The 3-phase separator is built in compliance with ASME Section VIII, Division 1 and NACE. As an ASME licensed shop TSI Fabrication is capable of fulfilling client's three phase separator system needs, and can provide a turnkey solution from design, engineering calculations, 3D modeling, to fabrication. From design to delivery, the entire drilling camp can be completed in as fast as 15 days, significantly shortening the preparatory time. ✓ Comfortable and. A separator is a gadget used to separate or isolate a well stream mixture of oil/gas/water into its constituents.
