

Transaction terms for 1 standard power scale photovoltaic cabinets

Overview

These documents can serve as starting points for contracts that improve consumer transparency and reduce transaction costs. Access the example standard contracts. These resources were developed by an NLR-led working group—convened from the solar, finance, and legal. When a solar project is owned by an independent power producer rather than a utility serving its own load, the agreement that provides for an assured source of revenue from the energy output and related environmental attributes of the project is central to the project's viability. In theory, the. The Blueprint How-To Guides, in contrast, provide additional detail to help practitioners get going. Awardees can reference these more granular steps, recommendations, and resources within each key activity as they get started implementing their EECBG projects and programs. 1 Under an EPC Contract, a Contractor is obliged to deliver a complete facility to the Project Company.
