

Tunisia solar grid-connected inverter production

✓ 50KW/100KWH

✓ HIGHER POWER OUTPUT
IN OFF-GRID MODE

✓ CONVENIENT OPERATION
& MAINTENANCE

✓ PRE-WIRED

Overview

In Kairouan, the 100 MW plant, financed in 2023, is reportedly 95% complete and could be operational by the end of 2025. The Tunisian government says concession and authorization frameworks are advancing multiple PV projects, while new entrants including SoleCrypt plan additional plants, boosting capacity, self-generation, and panel imports. Tunisia has a current power production capacity of 5,944 megawatts (MW) installed in 25 power plants, which produced 19,520 gigawatt hours in 2022. State power utility company.

WASHINGTON, J— The Multilateral Investment Guarantee Agency of the World Bank Group (MIGA) has issued a guarantee to AMEA Power Ltd. of the Cayman Islands for its investments in Kairouan Solar Plant, SARL in Tunisia. 5 million guarantee covers the risks of transfer restriction. The country has established a target of RENEWABLE ENERGIES: In, Tunisia launched the Prosol Elec program to promote the installation of solar panels on roofs connected to the low-voltage grid through subsidies and loans. In 2024, the energy dependency rate stood at 59%. Natural gas currently accounts for 94.
