

# Ukrainian telecommunications solar base station energy storage

**Scooter battery**  
The battery is installed in the pedal

**Built-in battery in car beam**  
The battery is installed in the car beam

**Pack the battery in the box**  
This is the battery installation box, replace the battery core without changing the shell

## Overview

---

The system's 20 kWh energy storage capacity is sufficient to power a base station for four to six hours, ensuring critical communication services remain online. In a significant move towards energy resilience and sustainability, Vodafone Ukraine has announced an ambitious plan to equip 100 of its mobile base stations with solar power facilities. As reported by the Vodafone Ukraine press service, the company is thus launching a large-scale. Industry estimates indicate that Ukraine installed about 1. This brought the country's cumulative solar capacity to well over 8. Forbes writes about this with reference to the companies' press services. Kyivstar has installed solar panels in Odesa and Zhytomyr regions.
