

Umbrella-like photovoltaic bracket

Overview

A-style photovoltaic brackets play a crucial role in photovoltaic systems, with their simple structure resembling the letter "A. The invention belongs to the technical field of photovoltaic erection, and particularly relates to an inclined umbrella-shaped large-span bracket suitable for offshore photovoltaic and an installation method. For Unirac and ground-mount orders, please email sales@mrsolar.com or. Installation specification of umbrella type photovol components that attach the solar panels to the mounting surface. According to the connection form, it is divided into welding type and assembly type; according to the installation structure, it is divided into fixed type and day by day type;. For large-scale ground photovoltaic bracket, selecting the appropriate type of support structure is a critical step in improving the overall performance and economic benefits of the system.
