

Uruguay renewable energy growth

Overview

In 2005, Uruguay initiated a dramatic shift in its energy strategy, moving from petroleum-based electricity generation to renewable sources. The small Latin American country managed to cut its costs in half compared to the use of fossil fuels. In a regional context marked by sustained growth—investment in renewable energy. Uruguay is globally recognized for its significant achievements in renewable energy development. As the country transitions to the second stage of decarbonization of its energy matrix and looks to increase energy exports, there will be new opportunities for companies that can provide solutions. Uruguay's pragmatic and nonpartisan quest for renewable energy highlights how even small nations can achieve rapid decarbonization and economic growth — offering a powerful example for climate leadership amid global inaction. Uruguay remains an outlier in a region beset by challenges.
