

Victoria electric vehicle policy

Overview

In Victoria, the Victorian Government's Zero Emissions Vehicles Roadmap¹ sets out a target of 50 per cent of light vehicle sales to be zero emissions vehicles by 2030. ² AusNet has a critical role to enable this electrification of Australia's transport fleet and bring about the. upporting the uptake of EVs and other electric mobility options. It supports our. While the uptake of electric vehicles (EVs) has been slower in Australia than in many other countries, it is expected that the number of EVs in Australia will accelerate rapidly over the next five years. Some state and territory governments offer additional rebates and discounts for EV buyers, in addition to support by the Australian Government. The Australian, state and.
