

Weight of JinkoSolar 595 photovoltaic panel

Overview

The module, which measures 2,411 × 1,134 × 35mm, weighs 31.1 kg and features 156 p-type monocrystalline cells, is available in five versions with power outputs claimed by Jinko of 565 W to 585 W an. Better light trapping and current collection to improve module power output and reliability. Excellent Anti-PID performance guarantee via optimized mass-production process and materials control. High salt mist and ammonia resistance. 0 technology has better reliability. Loading. We do our best to provide information such as the JKM595N-72HL4-BDV panel dimensions, datasheet, warranty information, wattage and more wherever possible. We have an image for Jinko Solar. N-type Technology N-type modules with Tunnel Oxide Passivating Contacts (TOPcon) technology offer lower LID/LeTID degradation and better low light performance.

Weight of JinkoSolar 595 photovoltaic panel

Efficient Higher Revenue

- Max. Efficiency 97.2%
- Max. PV Input Voltage 600V
- 150W Peak Output Power
- 2 MPP Trackers, 150% DC Input Overvoltage
- Max. PV Input Current 15A, Compatible with High Power Modules

Intelligent Simple O&M

- IP66 Protection Degree: support outdoor installation
- Smart IV Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

Flexible Abundant Configuration

- Plug & Play, UPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. Current Inverter Thermal
- AFCI Function (Optional): when an arc-fault is detected the inverter immediately stops operation
