

What are home solar lights like

Overview

These lights consist of a solar panel, rechargeable battery, LED light, and a photoresistor that detects darkness. During the day, the solar panel absorbs sunlight and stores energy in the battery. Not everyone is ready or able to install rooftop solar panels or rig up a solar-powered water heater at home. But if you want to reduce your utility costs and your reliance on the grid, swapping out ordinary lights and other appliances for their solar-powered counterparts is one of the simplest. From portable bulb-like models to ceiling or wall-mounted, with different power outputs for any life situation. HouseAndBeyond is reader-supported.
