

What is wireless base station outdoor equipment

Overview

The base station's RF circuitry is housed in a small outdoor module known as a remote radio head (RRH) or remote radio unit (RRU). RRH performs all RF functions such as transmit and receive functionality, filtering and amplification. With its centralized management platform and high degree of flexibility, it is the ideal choice for providing point-to-point. A base station represents an access point for a wireless device to communicate within its coverage area. It usually connects the device to other networks or devices through a dedicated high bandwidth wire or fiber optic connection. Know more! . Check each product page for other buying options.

What is wireless base station outdoor equipment
