

# What size inverter is generally used outdoors

## Overview

---

The size of inverter generator you need depends on your appliance list, starting watt requirements, and use case. Most campers are well served by 2000–2400W, RV owners typically choose 3500–4500W, and homeowners often prefer 4000–6500W. But here comes the million-dollar question: What size inverter do I need for camping?

In this blog, we'll break it down to make sure you get exactly what you need without overkill. The need for an inverter size chart first became apparent when researching our DIY solar generator build. [Introduction: Why Inverter.](#) Choosing the correct generator size is the most important decision when buying an inverter generator. Too large and you overspend on wattage you never use. Inverters are useful pieces of equipment, but you're likely to have questions about the necessary equipment in order to make.
