

What to do if photovoltaic panels get blistered by the sun

Overview

If you suspect solar panel damage, the first thing to do is contact the installation company or another qualified solar energy system repair outfit. The technician can accurately evaluate the type of damage and the extent of the problem. There are a few ways to detect damage to your solar panels. A visual inspection may reveal broken or cracked glass, a problem with the frame or mounting or damaged or disconnected wiring issues. If you notice any issues with your system, take quick action to prevent them from getting worse. Recent data from the National Renewable Energy Laboratory (NREL) shows that photovoltaic panel blistering affects approximately 1 in 20 installations. Solar panels operate by converting sunlight into electricity. Gather necessary tools and materials, including a multimeter, adhesive, and protective.
