

What to do if the photovoltaic panels are snowed on

Overview

In most cases, you shouldn't need to clean snow off your solar panels. Light can get through the panels when there's a light dusting of snow, and when the snow is heavier, the 45-degree angles of most equipment should facilitate the snow sliding right off. And when snow does become a problem, the easiest way to automatically remove snow on solar panels isn't a rake or a gadget; it's smart system design. [How Does Snow Affect Solar Panel Performance?](#)

Solar power reduces your reliance on the electrical grid and lowers your utility bills. While the efficiency of solar panels drops in winter, proper snow removal techniques can help keep this loss to a minimum. Additionally, we address common concerns. Snow-covered panels won't receive the sunlight they need to operate at peak efficiency.
