

Where are the dormitories where the photovoltaic panels are installed

Overview

NY SOLAR MAP estimates rooftop and ground mount solar electric potential (PV panels) and connects you to local solar resources. To address NYC's commitment to 1 gigawatt of solar by 2030, HPD partnered with the New York State Energy Research and Development Authority (NYSERDA) and non-profit Solar One to develop HPD's Solar Where Feasible program. Solar Where Feasible helps buildings optimize solar across HPD's portfolio. By participating, you share clean solar energy generated by panels installed on the roofs of New York City Housing Authority (NYCHA) buildings in your neighborhood. Since you are participating in the program, part of the energy is yours. The energy. New York State is making solar energy more accessible to homes, businesses, and communities through NY-Sun incentives and a network of qualified installers. Explore cost-benefit analysis, installation case studies, and policy incentives shaping this educational energy.
