

# **Who will bear the cost of dismantling the photovoltaic bracket**

## Overview

---

Whether it's for solar project removal or repowering with upgraded and more efficient solar technology, decommissioning is the responsibility of the project owner. Georgia: Starting in January 2025, mandates solar decommissioning requirements for companies. The average cost to remove solar panels from a roof in 2025 typically ranges between \$300 and \$750 per panel, depending on factors like system size, roof complexity, and local labor rates. The goal of decommissioning is to ensure the solar panel's components don't end up polluting our precious planet, whether by littering. Although solar accounted for 3% of U. Energy Information Administration projects that number will reach 20% by 2050. <sup>1</sup> In 2022 alone, solar will account for nearly half of all new electric generating capacity. Removing panels can protect your roof and maintain your eligibility for future solar upgrades.
