

Wind power and photovoltaic power generation distribution map

Wind power and photovoltaic power generation distribution map

[Free Solar Maps & GIS Data , High-Res Download , Solargis](#)

Access high-resolution static maps to visualize global solar potential. For site-specific prospecting and bankable project analysis, use our professional solutions.

[Renewable Energy Maps and Tools](#)

This collection of maps from NLR detail renewable energy resources across the United States, including biomass, geothermal, hydrogen, marine and hydrokinetic, solar, and wind.

Global Solar Atlas

Welcome to the Global Solar Atlas. Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for ...

Global Solar Atlas

The GSA provides an interactive map of solar resource and photovoltaic power potential and a variety of other environmental data relevant for understanding the practical and technical potential of solar ...

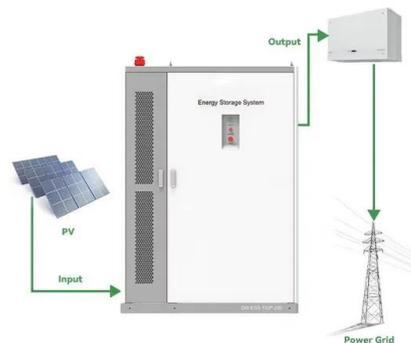

[Solar and wind power generation, 2025](#)

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find more about Ember's methodology in this ...

[Global Energy and Renewables Map](#)

The map combines three open energy datasets and allows visitors to explore global power plants and U.S. solar and wind energy projects using text search and map visualization tools.

[Harmonised global datasets of wind and solar farm locations and power](#)

Here, using OpenStreetMap infrastructure data, we present the first publicly available, spatially explicit, harmonised dataset describing global solar PV and wind turbine installations.

Global Wind Atlas

The Global Wind Atlas is a free, web-based application developed to help policymakers, planners, and investors identify high-wind areas for wind power generation virtually anywhere in the world, and then ...

Global Solar Atlas

The Global Solar Atlas, in addition to a series of global, regional and country GIS data layers and poster maps, has been developed to support the scale-up of solar power in countries across the world.
