

Windhoek renewable electricity

Overview

Windhoek aims to add 428MW of solar PV capacity to the grid by 2028, along with sizeable wind, battery storage and biomass capacity. In 2017, the Municipal Council of Windhoek approved the City of Windhoek Renewable Energy policy. One of the outcomes of this policy is the ongoing 25MW Solar PV project, which is. The latest Data Trends analysis from African Energy Live Data (Live Data) shows that Namibia's installed capacity was 663MW as of end-2023. Hydroelectric power (HEP) accounted for the bulk of this, namely utility Namibia Power Corporation (Nampower)'s 374MW Ruacana plant. RENEX is currently the only Namibian company recognised as a registrant. The City of Windhoek's 25-megawatt solar power project is at an advanced stage, with recommendations soon to be submitted to the Public-Private Partnership (PPP) board for consideration. City of Windhoek Chief Executive Officer, Moses Matyayi, said the project — aimed at expanding the city's. WINDHOEK, —Today marks the approval of Namibia's first ever World Bank financed energy project, aimed at improving the reliability of the country's transmission network and enabling increased integration of renewable energy into the country's electricity system. Officials said once the review is concluded, revised timelines will be.

Windhoek renewable electricity

[City of Windhoek progresses 25MW solar project with PPP](#)

In 2017, the Municipal Council of Windhoek approved the City of Windhoek Renewable Energy Policy to guide the development of renewable energy and increase its share in the city's ...

[The City of Windhoek 25MW Solar PV Plant Project](#)

The policy aims to guide the development of renewable energy and increase its share in the city's electricity mix. One of the outcomes of this policy is the ongoing 25MW Solar PV project, ...
