## Overview

---

This page provides information on Jinta Zhongguang Solar 100MW Tower + 600MW PV CSP project, a concentrating solar power (CSP) project, with data organized by background, participants, and power plant configuration. Subsidy free, supported by provincial coal tariff. The project data on these pages. According to the latest updates from the project site, from August 13 to August 15, the Jinta Zhongguang Solar 'CSP + PV' Pilot Project 100MW CSP Project ('Project') operated continuously for three days, with an average daily generation exceeding 1000 MWh. 024 million kWh in a single day, with a peak load of 100. The project began back-feeding on 30 March 2025.
